

## **VIÑA ECHEVERRÍA SUSTAINABILITY POLICY**

Viña Echeverría's mission is to produce wines which are at the same time of high quality but also profitable, and which exceed the expectations of our clients and consumers worldwide.

The pillars of respect for the environment, as well as for our collaborators, suppliers and community in which we operate, are also strongly upheld.

In order to achieve our mission, the main attributes that we define and apply are the following:

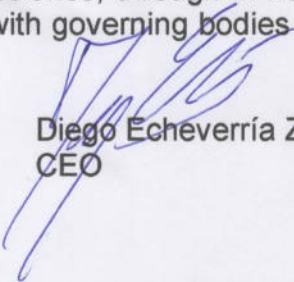

- Quality with Profitability
- Tradition and Modernity
- The Environment
- Human Resources / Personnel

Viña Echeverría is conscious that the protection of the environment is a fundamental tenet for any economic activity, thereby contributing to the sustainable development of our society on which all future generations depend.

Our company pledges to strive beyond the strict requirements of current sustainability normas, establishing procedures to guarantee the sound use of resources and the reduction of waste.

The fundamental principles in which we base our policy are:

1. Incorporate the concept of the protection of the environment in all decision-making processes, at every level of the organization.
2. Sound use of water and energy in a way to contribute to its conservation.
3. Reduce the production of waste, emissions and other environmental footprints through a sustainability program which continually controls the company's total environmental impact.
4. Leverage the use of renewable and cleaner energy and technology sources.
5. Within its staff, foster an environmentally friendly conscience, through in-house as well as external training programs, and collaboration with governing bodies and the community.
